Passionate Front-End Developer with a sharp eye for design and detail. I specialize in building responsive, user-centric interfaces using React, TypeScript, and modern UI frameworks. I don't just write code — I craft experiences. Constantly learning, consistently improving, and always ready to turn ideas into elegant, scalable solutions.

EXPERIENCE

Sfera IT Solution
2025-01-04 - Present

Frontend Developer

I am currently working as a Front-End Developer at **Sfera IT Solution**, where I build real-world web applications using React, TypeScript, and Next.js. My responsibilities include developing responsive user interfaces, collaborating closely with the design and backend teams, and ensuring a seamless user experience. Working in this fast-paced environment has significantly improved my code quality, teamwork, and time management skills.

Project: Smart LMS + CRM Platform
Worked on a real-world project at **Sfera IT Solution** to build a modern platform that combines LMS and CRM features. The system supports 4 user roles — **CEO, Admin, Teacher, and Student** — each with specific permissions and responsibilities.

Built dynamic interfaces with **React, TypeScript**
Implemented core features: course & student management, grading, homework, real-time chat, and analytics
Focused on clean code, role-based logic, and smooth UX
Contributed to creating a smarter, automated learning experience

Sfera Academy
Live Link | Github Link

I spent 2 days learning Next.js and started building the new design and features of the Sfera Academy website from the 3rd day. Through this project, I gained experience in using Next.js for SEO, server-side rendering (SSR), and building static websites. I added modern design elements to improve the user interface and overall user experience.

EDUCATION

EDUCATION

Sfera Academy 2024-02-01 - 2024-12-24

- Frontend course

Completed the Front-End Development course at Sfera Academy, where I gained strong fundamentals in web technologies. The course included monthly exams, and I consistently secured 1st place in all of them. I also took part in a 1-month internship, working on real-world projects and gaining hands-on experience in building modern web applications.

SKILLS

Frontend: HTML, CSS, SASS, PUG, Javascript, React, Next.js, TypeScript, Next.js, Query, Zustand, Axios, Router dom

LANGUAGES

- English - Intermediate
